

January 12, 2018

To whom it may concern:

It has been my pleasure to have worked with Dr. Ken Grey since he came on staff at Jupiter Medical Center in 2007. As Oncology Administrative Coordinator in a Comprehensive Cancer Program we recognized both the need and value of offering our patients integrative medicine services. As a licensed Doctor of Oriental Medicine and Acupuncture, he brought expertise and the passion necessary to grow those services and meet the needs of our patients. Staff and patients appreciate his empathy and caring.

Over the past ten years Dr. Grey has done a tremendous amount of community outreach to lay the foundation for these services and participated in the development of the Integrative Medicine Department at Jupiter Medical Center. He continues to serve on the steering committee.

He helped establish our integrative medicine lecture series and speaks on a wide range of topics taking a holistic approach to health care. Sharing his expertise on nutrition, the health benefits of juicing, women's health, acupuncture and much more has been an invaluable addition to our program. He has a very calm, gentle manner and is an engaging speaker with nothing but positive feedback from participants.

Dr. Grey has also provided physician, nurse and allied health professionals programs through our continuing medical education program. This has enhanced their knowledge base and provided a greater understanding of services available and evidence-based support of these practices.

One of the most impressive things Dr. Grey has done was to bring acupuncture into the operating room at our facility, enhancing cancer patients' surgical experience. This was truly an innovation in patient care. In my current role as Marketing Coordinator I've worked with Dr. Grey as well, he has been a spokesperson with the media when requested and has had an ongoing radio show on quality living for several years.

I would recommend Dr. Grey for anything, he is passionate about what he does, incredibly knowledgeable and committed to the health and wellbeing of patients.

Sincerely,

Sue

Sue Goulding, Marketing Coordinator
